Step by Step Directions

Inspire Your Customers To Create
Winning Combinations!

1 *Primula acaulis* Danova series – ‘Danova Rose,’ ‘Danova Blue,’ ‘Danova Cream Yellow’

The Danova series is known for its quality and exceptionally uniform habit. Boasting excellent bloom size and count, Danovas add a unique look to combination designs of all shapes and sizes. As you can see, Danovas blend well with early season bulbs and trailing accent plants.

2 Variegated ivy

Underused in containers, ivy adds color interest and texture to any combination planting. Ivy can climb or trail, is evergreen and performs well in sun and shade. Try it out!

3 Forced bulbs

In this case, daffodils... Forcing bulbs for container planting is a great way to add consumer interest to just about any design. Feel free to use forced tulips, hyacinths, daffodils, callas or pretty much anything you want and mixed containers are sure to fly off the shelves.

Note: This combination was designed and planted at Molbak's garden center in Seattle, WA.
